Business Travel with no worries

Meet Sam:]

Sam is designed to know a lot about you – what you like, where you're going and what you need.

Your pocket travel assistant will see that every step of your journey is smooth.

**Are you ready
for the new age?**

**Hi Kate,
Your flight home is
on time and traffic
is looking clear.
Time to relax!**

What does Sam do?

better travel experience

By organising and sending you up to date, practical information based on context, relevance and individual preference, Sam will help you enjoy your experience. So you can focus purely on your destination.

From pre-trip information, such as letting you know your destination weather to help you pack, to organising your airport transfers and letting you know about gate changes, you'll find Sam really helpful.

Sam will alert you based on up to date travel information to ensure you don't miss your connection. But if you do, Sam will help schedule you onto the next best option, all within your company travel policy.

Want Sam to suggest and find you a rated local restaurant? You can use Sam for that too.

Sam is always on, so you don't have to be.

How does Sam do it?

smarter technology

The power of technology is changing the very nature of corporate travel. Sam is designed to incorporate the most important features that a traveller needs, and the experiences that a leisure traveller enjoys.

What is the result? A powerful combination of data and functionality, with a little bit of 'Sam' personality added on top.
